## RESEARCH INTERESTS

**RESEARCH INTERESTS**  
My research is focused on investigation of pathogenic microorganisms (Fungi and Bacteria) on native and invasive plants in Lithuania. I have experience in various methods of molecular biology and microbiology: isolation and cultivation of fungal and bacterial cultures from infected and healthy plants material, DNA extraction, PCR-based techniques (as 16S rRNA gene, PCR melting Profile (PCR MP), repetitive PCR (rep-PCR), multilocus sequence analysis (MLSA), 18S rDNA and etc.), gel electrophoresis, preparation for sequencing.
