EDUCATION AND ACADEMIC DEGREE

- 1995 – 2002 Vilnius University and Institute of Botany (Vilnius, Lithuania), PhD (Doctor of Biomedicine Sciences, 04 B, botany).

1989 – 1994 Vilnius University, Faculty of Natural Sciences, Department of Genetics, M.Sc. in Biology-Genetics.

PROFESSIONAL EXPERIENCE

- | | |
|------------------|--|
| 2021 – until now | Senior Researcher of the Laboratory of Ecotoxicology, Institute of Ecology of Nature Research Center, Lithuania |
| 2019 – 2021 | Senior Researcher of the Sector of Ecological Physiology and Toxicology at the Laboratory of Fish Ecology, Institute of Ecology of Nature Research Center, Lithuania |
| 2016 – 2019 | Researcher of the Sector of Ecological Physiology and Toxicology at the Laboratory of Fish Ecology, Institute of Ecology of Nature Research Center, Lithuania |
| 2014 – 2016 | Senior Researcher of the Laboratory of Algology and microbial ecology, Institute of Botany of Nature Research Center, Lithuania |
| 2010 – 2014 | Senior Researcher of the Laboratory of Radioecology, Institute of Botany of Nature Research Center, Lithuania |
| 2008 – 2010 | Senior Researcher of the Laboratory of Radioecology, Institute of Botany, Lithuania |
| 2004 – 2008 | Researcher of the Laboratory of Radioecology, Institute of Botany, Lithuania |
| 2002 – 2004 | Junior Researcher of the Laboratory of Radioecology, Institute of Botany, Lithuania |

RESEARCH INTERESTS

Main interests of scientific research: ecotoxicology, nanotoxicology, plant and fish physiology, ecology, environmental studies. I conduct research related to the investigation of effects of various stressors (heavy metals, cyanotoxins, nanomaterials, radionuclides, etc.) on the growth and physiological state of algae, higher plants, crustaceans, and fish. I am particularly interested in researching the physiological and biochemical mechanisms of the body's reaction to individual pollutants and their mixtures; I am also very interested in the interaction of contaminants in multicomponent mixtures. I participate in complex ecotoxicological studies and use biological methods to study the toxicity of industrial wastewater and the contamination of water bodies. I conduct searches for the processes of distribution and accumulation of various pollutants in water ecosystems. In addition, I am very interested in research on the uptake of various substances from the incubation medium into organisms and their transfer to the organs and tissues of organisms, especially when exposed to substances that can potentially be used for wastewater treatment. I also carry out research, assessment, and prediction of changes in the ecotoxicological status of water

ecosystems under the influence of anthropogenic influences I also participate in researching the possibilities of using treated wastewater in technological processes and agriculture for the economic and sustainable use of water resources.

PUBLICATIONS

Scientific articles published in journals (books), indexed in „Clarivate Analytics Web of Science“ database (with citation index):

PARTICIPATION IN INTERNATIONAL AND NATIONAL SCIENTIFIC PROGRAMMES AND PROJECTS

2021 – 2023	Principal investigator „Development of functional fish feed additives from natural algal biomass” (funded by Agency of Science, Innovation and Technology of Lithuania (MITA))
2020 – 2022	Principal investigator "Fish as a model of trophic ontogenesis in the study of nanoparticles transport through aquatic food chain in the context of climate change" (funded by Research Council of Lithuania)
2019 – 2021	Investigator Framework for Organizational Decision-Making Process in Water Reuse for Smart Cities (SMART-WaterDomain)
2017 – 2020	Participant Cyanobacteria, Viruses, protozoan and Metazoan – Understanding ecological interaction of ecosystems. International collaboration between Lithuanian and Poland Academies of Sciences.
2015 – 2018	Investigator "Nanoparticle and heavy metal toxicity mechanisms in fish during ontogenesis" (funded by Research Council of Lithuania)
2014 – 2018	Participant European network for algal-bioproducts (EUALGAE). ESSEM COST action ESSEM COST Action ES1408 International programm.
2013 – 2014	Leader „Complex investigations of the Tytuvėnai lakes“ (part of project „Cross Border Cooperation for Sustainable Management of Lake Areas in Kurzeme and Lithuania“ (Nr. LLIV-326).
2012 – 2014	Principal investigator "Nanoparticle and heavy metal toxicity mechanisms in fish during ontogenesis" (funded by Research Council of Lithuania)

INTERNSHIP AND TRAINING

- 2007 NATO Advanced Research Workshop „Dangerous Pollutants (Xenobiotics) in Urban Water Cycle“ Lednice, Czech Republic.
- 2015 Internship at the Institute of Oceanography of the Faculty of Oceanography and Geography of the University of Gdańsk (Poland) in order to improve the ability to work in the field of liquid chromatography and mass spectrometry in determining the composition and amount of cyanotoxins in water and bottom sediment samples.

PARTICIPATION IN SCIENTIFIC (2022)

International scientific conferences:

1. Kazlauskas, M., Jurgelėnė, Ž., Butrimienė, R., Kazlauskienė, N., Montvydienė, D. 2022. Risk assessment of nano- and micro-sized materials for terrestrial and aquatic ecosystems. *Proceedings of the Ninth International Conference on Environmental Management, Engineering, Planning and Economics (CEMEPE 2022) and SECOTOX Conference* Mykonos island, Oral presentation.
2. Butrimienė, R., Kalnaitė, A., Januškaitė, E., Bagdonas, S., Jurgelėnė, Ž., Butkauskas, D., Virbickas, T., Montvydienė, D., Kazlauskienė, N., Skrodenytė-Arbačiauskienė, V. 2022. An in vitro assay to assess the antibacterial efficacy of Cd-based, Cd-free quantum dots and Cd²⁺ on gut bacteria from wild *Salmo trutta* fry. *Proceedings of the Ninth International Conference on Environmental Management, Engineering, Planning and Economics (CEMEPE 2022) and SECOTOX Conference* Mykonos island, Oral presentation.
3. Jurgelėnė, Ž., Montvydienė, D., Šemčuk, S., Stankevičiūtė, M., Sauliutė, G., Pažusienė, J., Morkvėnas, A., Butrimienė, R., Kazlauskas, M., Kazlauskienė, N., Karabanovas, V. 2022. Acute toxicity assessment of graphene oxide nanoderivatives on *Salmo trutta* at early development stages. *Proceedings of the 16th International Conference on Protection and Restoration of the Environment* Kalamata, Oral presentation.

PARTICIPATION IN THE STUDY PROCESS

Supervision of PhD students:

Research area: Natural science (N000). Research field: Ecology and Environmental science (N012)
Mindaugas Kazlauskas Dissertation thesis: “Investigation of the impact of newly developed and environmental materials at the nano- and microscale to organisms of different trophic levels”. 2019–2023

Supervision of bachelor and master students (2022):

Dovilė Lenkauskaitė Bachelor thesis: The ability of graphene oxide nanoparticles to change metals (Cu, Cr(III), Ni, Zn) toxicity on algae *Scenedesmus quadricauda* ((Turpin) Brébisson, 1835) 2019–2022
