## EDUCATION AND ACADEMIC DEGREE

---

|             |  |
|-------------|--|
| 2019 – 2023 | Doctoral student of Natural Sciences, Ecology and Environmental Studies (N 012) (Laboratory of Ecotoxicology of the Nature Research Center). Dissertation topic: "Investigation of the impact of newly developed and environmental materials at the nano- and microscale to organisms of different trophic levels". Supervisor: Dr. D. Montvydienė<br>Field of research: nanotoxicity, trophic level, alga, daphnia, plant augalams. |
| 2011 – 2013 | Mykolas Romeris University, Public Administration (specialization - administration of healthcare facilities) / Master's degree. Master's thesis topic: "Availability of dental services at Vilnius University Hospital Žalgiris Clinic".<br>The work was carried out at Mykolas Romeris University, Faculty of Politics and Management, Institute of Political Sciences. Supervisor: prof. Dr. D. Jankauskienė                       |
| 2007 – 2009 | Lithuanian University of Education, Biology / Master. Master thesis topic: "Comparison of morphophysiological and physiological indicators of artificially bred and naturally spawned salmon fry". The work was carried out at Vilnius Pedagogical University, Faculty of Natural Sciences, and Department of Zoology. Supervisor: Assoc. Dr. K. Baranauskas   |

## PROFESSIONAL EXPERIENCE

---

|                     |   |
|---------------------|---|
| 2019 11 – until now | Head of Department, Budgetary Institution   |
| 2020 04 – until now | Biologist, Nature Research Center, Laboratory of Ecotoxicology  |
| 2015 12 – 2018 04   | Head of department, Public Company  |
| 2008 07 – 2015 07   | Deputy Director, Public Company Vilnius University Hospital Žalgiris Clinic                           |
| 1998 09 – 2008 07   | Manager of business client solutions, Business client manager, Consultant, Closed Joint Stock Company |
| 1997 11 – 1998      | Consultant, Closed Joint Stock Company  |
| 1997 04 – 1998 11   | Consultant, Closed Joint Stock Company  |

## RESEARCH INTERESTS

Area of research - complex study and comparison of the action of newly developed and natural nano- and micro-sized substances on organisms of different trophic levels: algae *Scenedesmus quadricauda*, crustaceans *Daphnia magna* and for plants *Lepidium sativum*; using standardized

toxicological methods to estimate the danger of these substances for organisms and forecast possible risk for terrestrial and aquatic ecosystems; study possibilities of metals removal from water and soil by nanocomposites. I analyze peculiarities of biological effects depending on the size, duration of exposure, and concentration of the studied nanomaterials and determine peculiarities and regularities of accumulation of these substances in organisms. I try to create an empirical model explaining the mechanisms of exposure to nano- and micro-sized substances on aquatic and terrestrial organisms of different trophic levels.
